**G-Accounts & Finance** module helps business by providing great financial control through business integration, better tracking, and management of finances through your mobile phones. It provides inbuilt workflows; they automate your accounting and streamline the process of data entry that improves the management of cash, resolves problems with cash flows, and simplifies complex accounts payable and accounts receivables activities.

**G-Stock Management** module optimised for inventory management automates necessary functions so that stock purchasing, organising and transferring are in sync. It also helps to maintain optimal levels of stock at every step by integrating the inventory needs of staff, customers and suppliers.

**G-Sales & Purchase** module enables companies to create distinct facilities for sales representatives and brokers, distributors, retail, key accounts, and online access portal via mobile.

**G-Sales & Purchase** aimed to streamline the procurement functions for inventory purchases, assigning orders to vendors, and billing and invoicing. In terms of information storage, the system automatically records and stores data pertaining to different sellers, purchase orders and requests and purchase returns. It handles orders, invoices, and events from multiple SAP and non-SAP systems

**G-Sale Bill** module facilitates sales cycle steps like capturing inquiries, order placement, discounts, order scheduling, dispatching stock transfer between warehouses. Deliver consolidated invoices, resolve disputes, and manage credit scoring with a complete view of the customer.

**G-Multilingual** module fully supports business operations in multilingual environments. G-Multilingual multi-language support spans system elements such as screens, reports, messages and even transactions.

**G-Profit & Loss Report** automation makes it absolutely easy to collate data about business performance across the entire organisation and use the information to manage your business on mobile. It provides profit and margin contribution with real-time reporting, predictive analytics, and integrated business planning at one glance.

**G-Balance Sheet** module compiles information from ledgers, employee journals, other financial statements, and expense reports into one comprehensive report. Companies can use this simplified financial record to potential investors to give them a complete overview of the company's financial standing.

**The G-Trial Balance** module delivers a trial balance summary report that ensures the entries in a company's bookkeeping system are mathematically correct.

**G-Daily Transactions** module keeps recording of sales and revenue transactions, cash transactions, accounts receivable, accounts payable and provides summaries of transactions in your general ledger.

**G-Ledger** module helps the business to maintain the chart of accounts and controls financial periods, allocations, assets and liabilities, and provides instant access to timely, accurate financial data.
