Accounts & Finance module empowers businesses to complement the financial aspects and needs. In addition, it streamlines the tax regulations in automotive businesses as well as the financial and accounts reports that help to manage the payments, accounting, and banking needs in the cloud environment.

Stock Management, an automotive ERP software is a powerful stock management system that helps you to keep records of customer demands and accordingly maintain appropriate stock levels. This helps you to achieve more consistent order delivery and on-time services in a cloud-based environment.

The sales & Purchase module helps automotive businesses to speedy billing by customers, and purchasing material which ultimately generates more profit. The sales & Purchase module allows your customers to pay through any methods they want to, keeps records of each of these payments of sales & purchase, tracks cash flow and expenses, and all other transactions. All these can be done from a single automated cloud-based dashboard.

Gate Pass (In/Out) module is based on automated cloud and mobile technology and is used to track a material moving in and out of a facility. Gate Pass helps to automate the entire material gate pass process and when we purchase any material, it automatically stocks this material with a pass.

Sales Tax Invoice (Stock & Services) module helps Auto Car Dealers to increase VAT compliance, minimize VAT fraud, increase Tax Revenue via a cloud-based environment. It stores tax invoices data, confirms if details for tax rate information are correct, Issues control unit invoice numbers, checks the authenticity of the pin provided and helps in the verification of the validity of a tax invoice through a cloud mobile app.

Profit and Loss report helps the Auto Car Dealer businesses to figure out whether or not the business made money in a given period and how much is earned or lost. Using an automated cloud-based mobile app, the organization may enhance its performance by looking at how profitable different areas of the business are.

Balance Sheets module provides important documents and information for Auto Car Dealers because they keep business owners informed about their company's financial standing and performance at one glance through an automation cloud-based environment.

The trial balance module summarizes all of the Auto Car Dealer's financial transactions and offers a check on the mathematical correctness of all financial transaction records.

The daily Transactions module has the potential to let you access information about day-to-day decisions. It enables decision-makers to acquire the potential to instantly get to view sales dynamics, perform an analysis of inventory turnover and carry out an evaluation of the buying behavior of customers, evaluate trends, sort out product offerings, work on pricing, vendors and make better judgments.

The ledger module helps to perform an analysis on different types of costs or expenses that occur while running a business and provides an accurate record of all financial transactions.
