G-Accounts & Finance basic aim is to predict and estimate accurately vital financial plans. It lets you use historical reports and current cost analyses to create financial models and compare alternate budgets and costs to find the best financial plan for your business.

G-Job Handling (Import & Export) module simplifies the complicated operational problems of importing or exporting products in lots or containers. The integrated solution for Import/Export Management adds real value by allowing for the timely control of important logistic operations, resulting in cost savings, improved service quality, and accurate workflow and worldwide communication.

G-Job Handling (Import & Export) module delivers broad features integrated into one platform to solve and automate the complicated and unique process of importing and exporting. The transfer of required documents, costs, and coordination among import/export stakeholders, shipping services, shipping lines, customs/regulatory authorities, and agents are all handled efficiently and accurately.

G-Petty Cash module provides information relating to cash flow of the Port, by processing and analysing all cash and bank transactions, arising out of payment of supplier's invoices, receipt from sales invoices, creating expense vouchers for the Port Charges, other expenses on the port through a mobile application, submit vouchers, Approval process on the expense of vouchers, clarifications, stand-alone payment, and unallocated payment/receipts.

G-Petty Cash module also allows analysing financial transactions for a given period of time and provides information about sources of funds and use of funds to ensure liquidity to meet payment obligations of the port on your mobile.

G-Sales Tax Register module focusing on automating tax calculations regarding port transactions, tax reporting, and documentation to eliminate manual processes and enhance transactional compliance that will enhance efficiencies for data visibility and indirect tax reporting on mobile.

G-Voucher Approval Process allows clients to keep their Accounts Payable departments running at full capacity even when their staff work from home. Electronic workflows may be used by your team to enter payables, process expenditure reports, and execute check runs.

G-Vehicle Management provides the most modern and outstanding Vehicle Management ERP software. Our system is not restricted to managing individual vehicles but includes the daily management of vehicles, fuel, services, drivers, and other vehicle base performance. G-VM includes an integrated system that will help you keep all your information or data in one place.

Our ERP software provides error free records for auditing, expressing strategies, designing & implementing policies, procedures.

G-User and Role Management eliminates the chances of human errors, while increasing data integrity by restricting unauthorised edits and changes. Role-based access levels and data security measures such as end-to-end encryption adds another security layer of protection to company data that ensures sensitive company information stays safe.

G-Profit & Loss Report boost profitability by providing you with a better understanding of what is going on in your firm. By continuously monitoring company changes, the system allows you to identify problems as they arise, rather than days or weeks afterwards.

G-Balance Sheet compiles information from ledgers, employee journals, financial statements, and expense reports into one comprehensive income statement. This simplified financial record to potential investors to give them a complete and comprehensive overview of the company's financial standing.

G-Trial Balance audits your accuracy of postings by comparing whether the total debits equal to total credits and establishing a summary of balances in preparation for formal financial statements.

The G-Ledger module is the heart of the finance package of a Custom Management ERP system. Through integration with logistics, business processes as well as with accounting sub ledgers of other finance modules such as accounts payable, accounts receivable, cash management make it easy to use.

One of the important functions of G-Ledger is to update the sub ledger, thus eliminating the time consuming reconciliation. G-Ledger also provides summarised data for use in planning, control and reporting.
